EDITION 42

HOMES OF COMFORT

CARR-CULLEN CO.
MINNEAPOLIS

OUR PLAN SERVICE

A complete estimate of the Millwork for any of the designs shown in our plan book, Homes of Comfort, Supplement No. 1, will be furnished on request. For other designs, see Edition No. 42.

Plans, Specifications, and Material List will be furnished, free of charge, **only when order for all the Millwork is placed with us.**

On account of the enormous expense in the handling of our Plan Department, it has become necessary to hold back in the furnishing of Plans, Specifications, and Material Lists until the transaction has become a reality.

If it is necessary to furnish Plans, Specifications, and Material List to complete a transaction before order for the Millwork is placed, then the following charges must be made:

Design	Cost	Design	Cost	Design	Cost
BW-4300	\$25.00	BW-4316	\$25.00	BW-4332	\$12.00
BW-4301	30.00	BW-4317	15.00	BW-4333	12.00
BW-4302	25.00	BW-4318	20.00	BW-4334	12.00

NOTE

Any design in this book can be redrawn for any construction wanted. Kindly let us know when ordering plans, whether frame, brick veneer, or stucco construction is desired.

NOTE: It is customary with us to issue an invoice to cover all plans sent out. If we are favored with the order for all the Millwork, a credit memorandum will be issued for the Plans Specifications, and Material List. CREDIT IS ALLOWED, HOWEVER, ONLY WHEN ORDER FOR ALL THE MILLWORK HAS BEEN PLACED WITH US.

Yours very truly,

Complete Plans and Specifications
Are Available for All Designs

COOPERATIVE PLAN SERVICE. Our main purpose is to help the dealer make sales through our plan service. The utmost cooperation will be given and we naturally expect the dealer to reciprocate. Complete plans and specifications for any of the designs shown in this book will be furnished on request with the understanding that they will be charged for, but if we receive the order for the millwork this charge will be cancelled. Special Plans will be drawn to your order, if no plan in this book is found suitable. In cases of this kind a sketch should be sent, with an illustration of some other design from which you received your idea, with notes on the changes wanted or pointing out any variation.

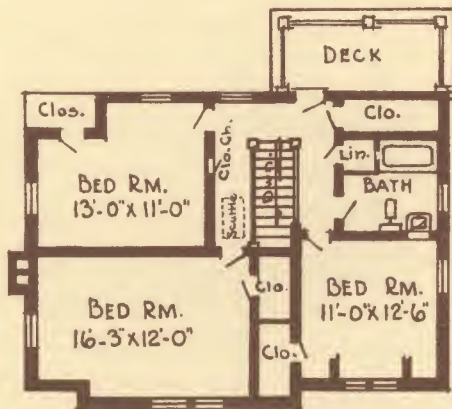

BW 4300 ULTRA HOME APPEAL

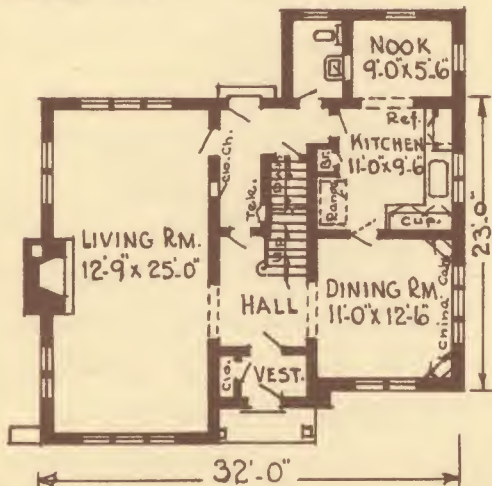

Strikingly attractive and because of an exterior that is decidedly different from the ordinary, this plan will immediately appeal to one who knows and values artistic architectural design of high merit. Scrupulous attention to small details has produced a home that is well nigh faultless. There is a compact, though roomy interior with one bedroom and lavatory on the first floor and three bedrooms and bath upstairs. The living room is of splendid size with a fireplace occupying one end. Grille doors, forming the entrance to the dining room, present a pleasant relief from the usual plastered arch and are extremely decorative. The kitchen also is large, completing a scheme of providing most space in the rooms which are used most.

F.C.

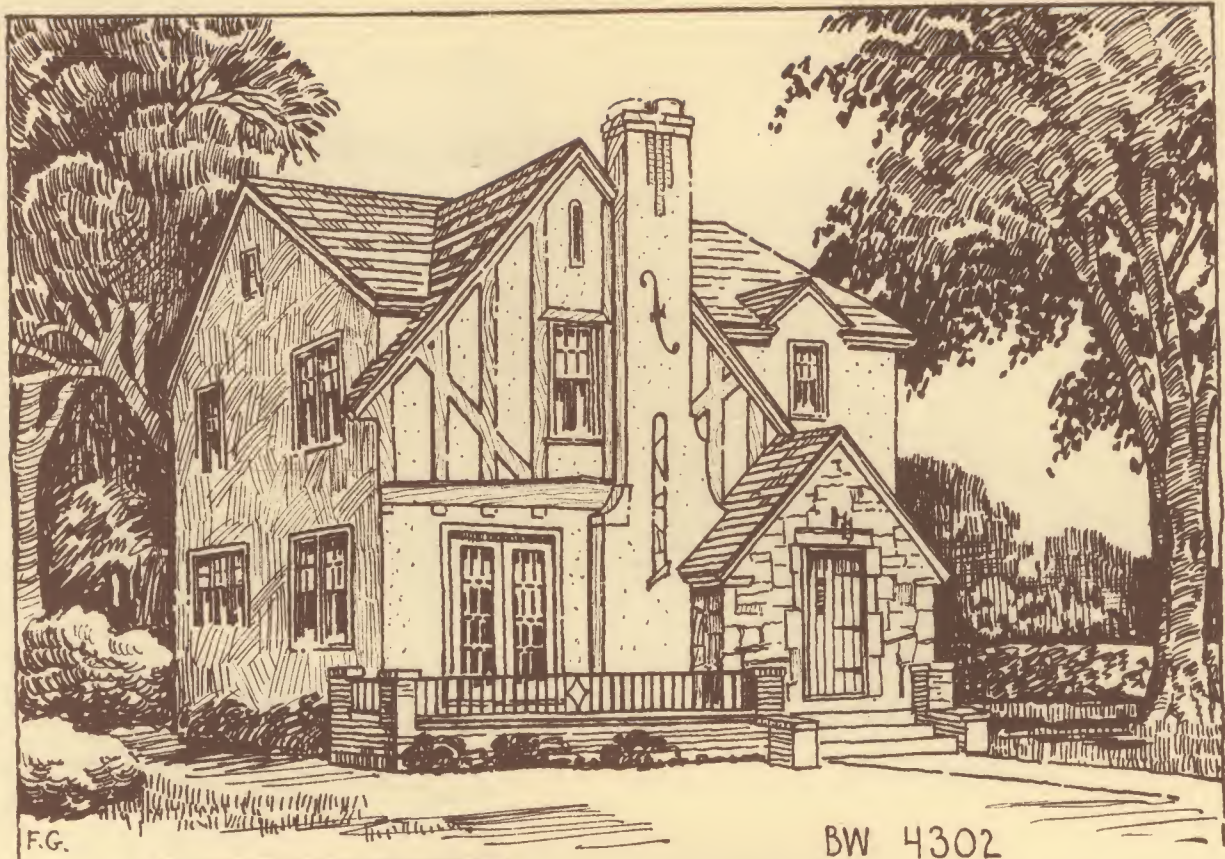

SECOND FLOOR PLAN

FIRST FLOOR PLAN

BW 4301 AN OUT-STANDING DESIGN

This unusual and out-standing design, in brick and stucco, is a departure from the ordinary run of homes. The architectural treatment of detail, the harmonious combination of materials and the perfect proportions of the house make the exterior most attractive. The floor plans are equally successful. There are six main rooms. The first floor contains three rooms - a beautiful large living room, a dining room, a fully equipped kitchen with nook and a lavatory. On the second floor are three large bedrooms and bath.

F.G.

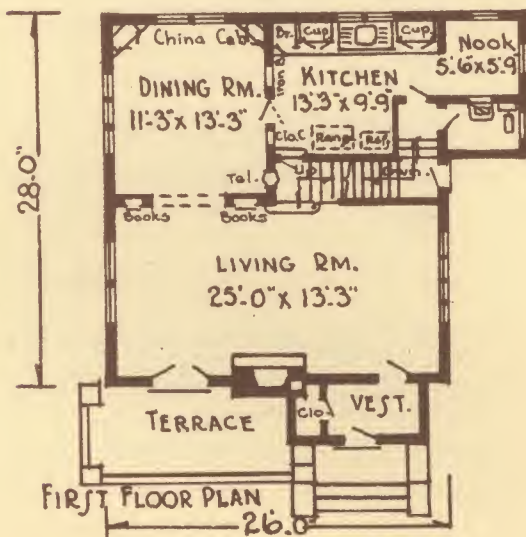

BW 4302

AN ENGLISH DESIGN

Here is an attractive house based on modern English designs. An unusual effect is given the front elevation by the harmonious blending of such materials as stucco, stone, brick and timber work. The floor plans embody all the modern ideas. The first floor plan contains a large living room with open fireplace, and a stairway accessible to both living room and kitchen. Besides a well planned dining room and kitchen there is a breakfast nook and lavatory. A noteworthy feature of the first floor is the large front terrace which will double the pleasure of a home for many people. Three large corner bedrooms with sufficient closet space and a bath with a much desired dressing table complete the second floor plan.

SECOND FLR. PLAN

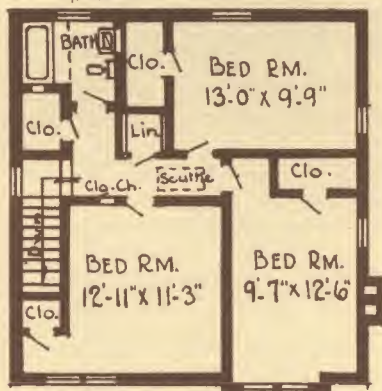

FIRST FLOOR PLAN

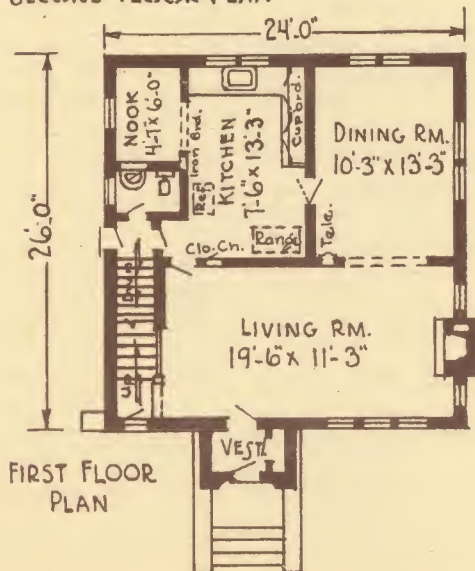

BW 4303

PRACTICAL, ECONOMICAL

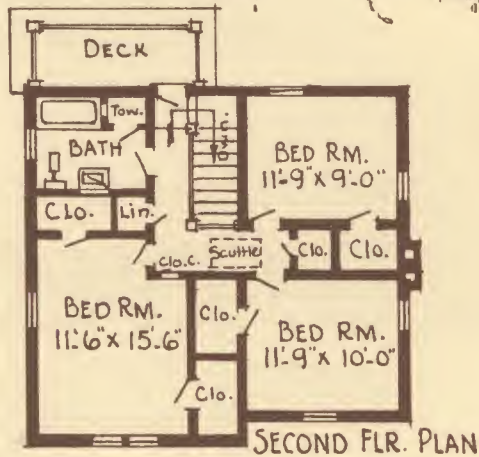

Many of the best English type houses are too large for the needs or resources of the average person. The six-room house pictured above is an ideal design for those wishing a moderately priced home. On account of its narrowness—only 24 feet across the front—this house is most practical for a narrow lot. The interior is exceptionally well planned—there are six good rooms and every possible comfort, convenience and equipment within minimum space is provided.

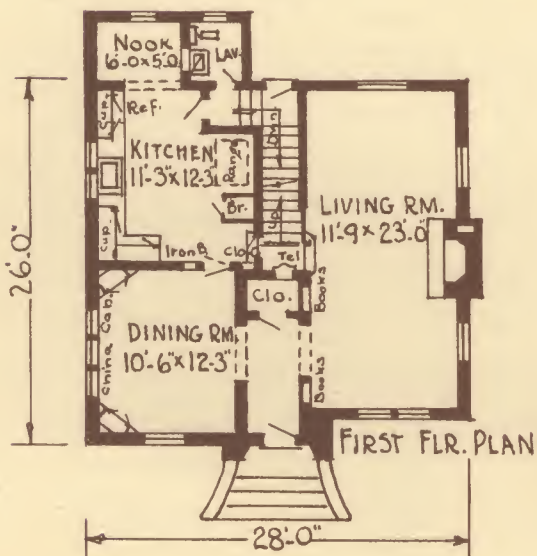

SECOND FLOOR PLAN

FIRST FLOOR PLAN

SECOND FLR. PLAN

FIRST FLR. PLAN

BW 4304

ENGLISH TYPE HOUSE 28'-0" x 26'-0"

Here is a small English stucco house of pleasing and harmonious design and excellent proportion. The recessed doorway with stone trim and the half-timbered second story relieve the effect of plainness of the exterior. The floor plans are excellently arranged - the living room occupies one entire side of the first floor and the dining room and kitchen share the other half. The kitchen is a model of convenience and has a breakfast room adjoining. There is a lavatory off from the rear entry. The three bed rooms on the second floor are light and airy and have sufficient closet space.

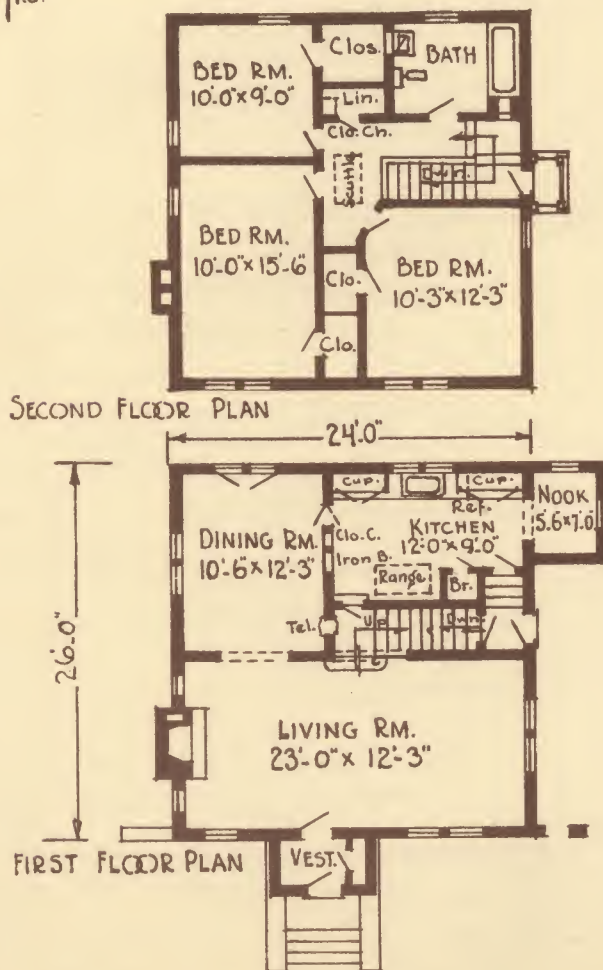

FIG.

BW 4305

ENGLISH STUCCO HOUSE

Because of the wide pretentious front, this comparatively small English house has an appearance of being much larger than it actually is. The dimensions of the house are only 24'0" x 26'0". The floor plans are compact and the rooms are conveniently arranged. The location of the stairway is most successful as it is accessible to both living room and kitchen. The large living room with fireplace and three outside walls makes a particularly attractive room. Three good sized bedrooms occupy the second floor.

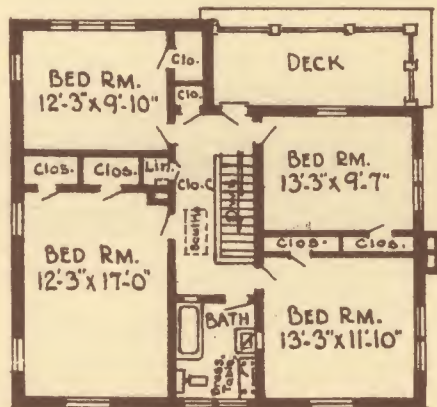

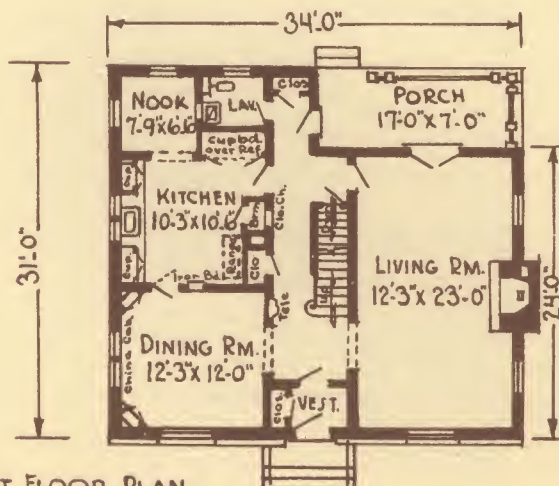

F.G.

BW 4306

COLONIAL 34'-0" x 31'-0"

SECOND FLOOR PLAN

FIRST FLOOR PLAN

This two-story house is a splendid example of the Colonial type carried out in stone and wide siding. The overhanging second story, the strictly symmetrical placing of the shuttered windows and the well designed central entrance all contribute to the distinctiveness of the exterior. The house is 34'-0" x 31'-0" and has a splendid lay-out. The first floor includes a living room extending across the entire right half of the house with a large porch in the rear. There is a spacious dining room, a well arranged kitchen with breakfast nook adjoining and directly off the rear entry, a lavatory. The second floor has four large bed rooms and a bathroom conveniently located.

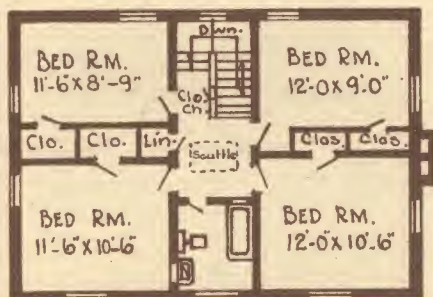

BW 4307

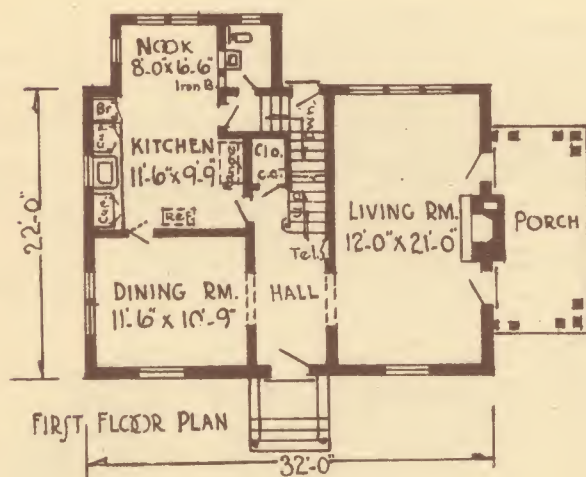

F.G.

EARLY NEW ENGLAND COLONIAL

The illustration above is an adaptation of the early New England Colonial with the overhanging second story. This style is one which will never become "out of date" as it has been an accepted and well recognized type of architecture ever since the beginning of our national history. Due to its stability of design and because of the fact that it is the most economical type to build, the Colonial house is in great demand. The floor plan is typically Colonial — a central hall, a large living room, the full length of the house, with a fireplace and a large open porch adjoining — on the other side a generous sized dining room, a modern kitchen and a breakfast nook. Four good sized bed rooms with excellent ventilation and plenty of closet space, and a conveniently located bath room complete the plan.

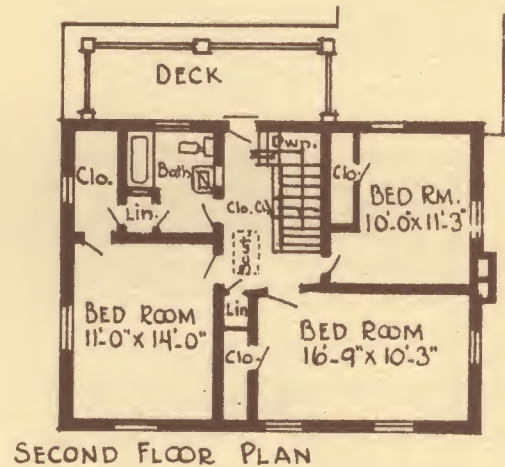

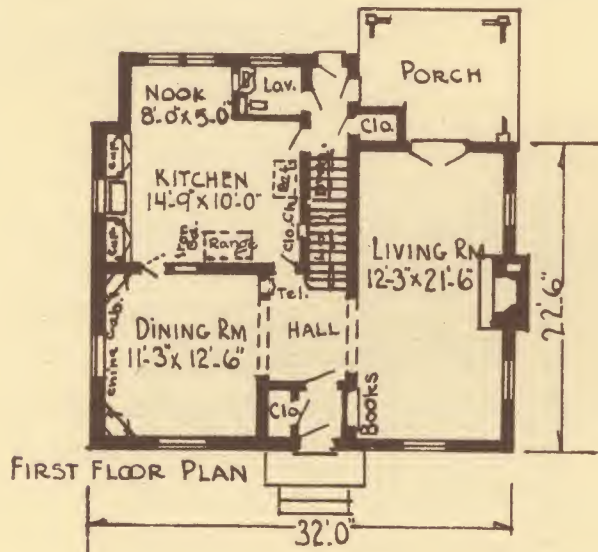

SECOND FLOOR PLAN

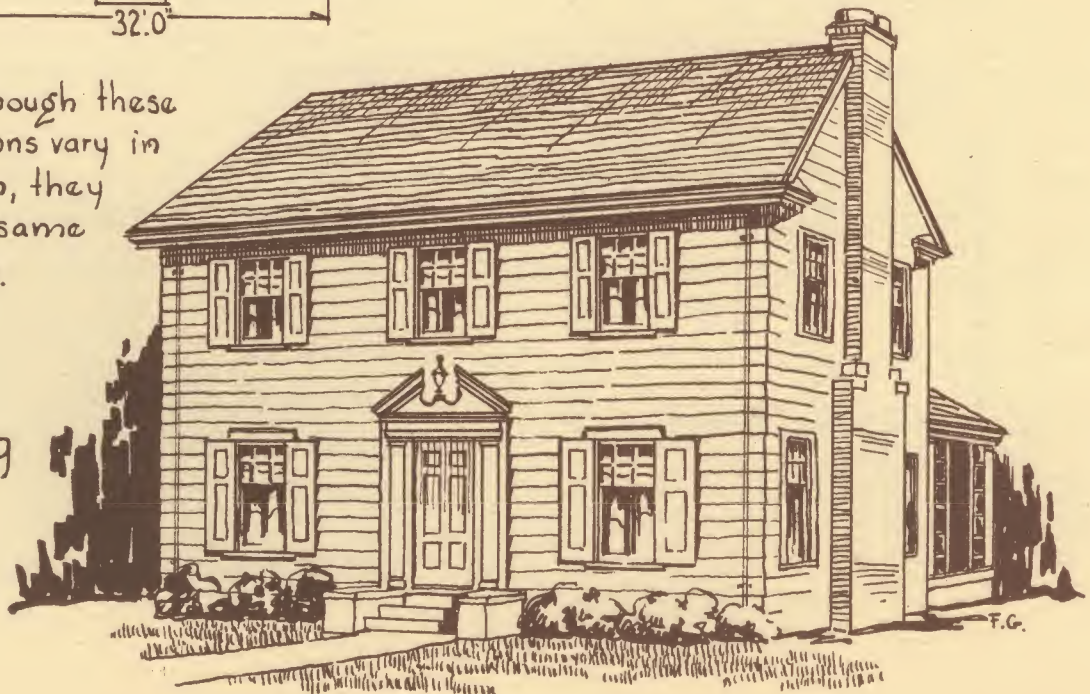

FIRST FLOOR PLAN

BW 4308

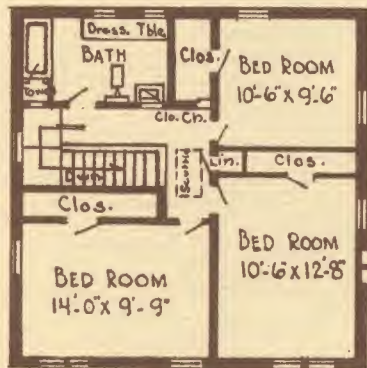

Note: Although these two elevations vary in roof design, they have the same floor plans.

BW 4309

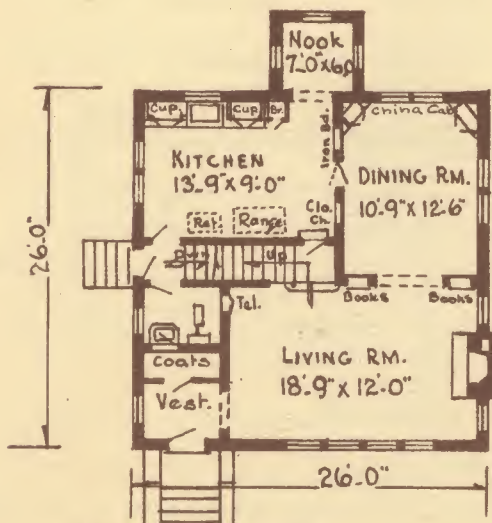

BW 4310 ECONOMICAL SQUARE TYPE

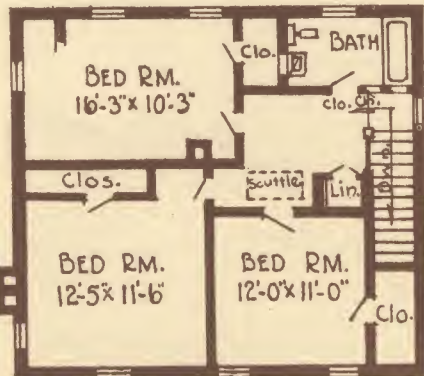

SECOND FLOOR PLAN

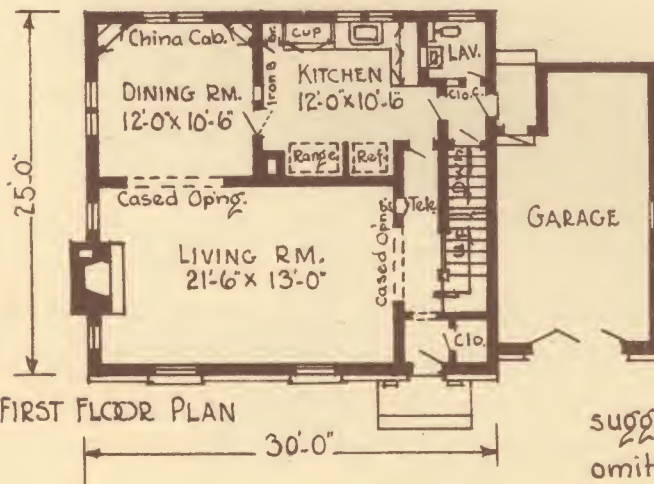

FIRST FLOOR PLAN

Here is an example of the square type of house, the simplicity of design and compactness of the plan will appeal to many. It is a dignified and substantial home and will remain in good taste for many years to come. The floor plans lack nothing in so far as modern ideas are concerned - a large living room, entered from a vestibule, has a fireplace at the end, and on either side of the arch to the dining room are open book cases. The dining room is good sized and has corner china cabinets, and the kitchen with nook adjoining is successfully laid out. A noteworthy feature of the first floor is the lavatory just off the side entry. The second floor has three splendid corner bed rooms with ample closet space. The bath room is modern in every respect and has a built-in dressing table and towel cabinet.

SECOND FLOOR PLAN

FIRST FLOOR PLAN

BW-4311

A 6 ROOM COLONIAL HOME

Here is an example of New England Colonial architecture at its best. It is shown here in brick and wide siding. To reduce the width of the Colonial, the entrance is placed to one side, thereby eliminating the central stairway. The plan is very compact, and the principal rooms of the first floor are arranged to give as great a sense of space as possible. Three bedrooms and bath are well arranged on the second floor.

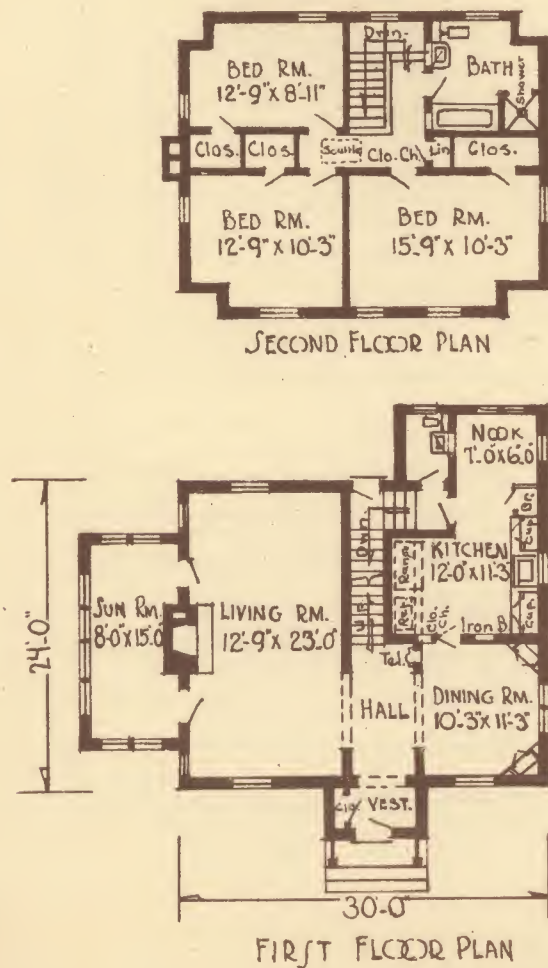

In the illustration, a garage is suggested on the side of the house, this can be omitted without marring the beauty of the design.

BW 4312

DUTCH COLONIAL

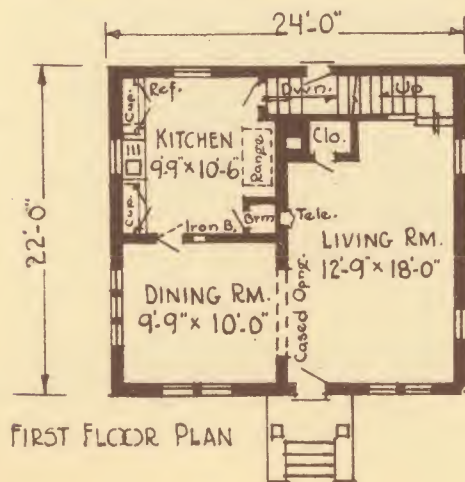

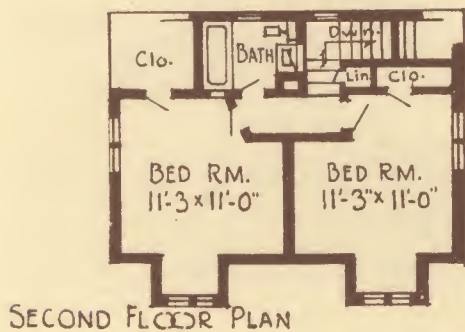

One of the most attractive styles of houses is the true Dutch Colonial pictured above. It is of frame construction, the exterior walls covered with either siding or shingles. The floor plans though compact do not cramp the living quarters. The entrance hall is in the center of the house leading into the living room and dining room on opposite sides. The large sun room adjoining the living room is entered by French doors on either side of the fireplace. A well arranged kitchen and breakfast room complete the first floor plan. The second floor contains three bed rooms, cross lighted and ventilated, with spacious closets and a bath room with shower. The bath room, being over the kitchen brings the plumbing into a direct line — a desirable economy.

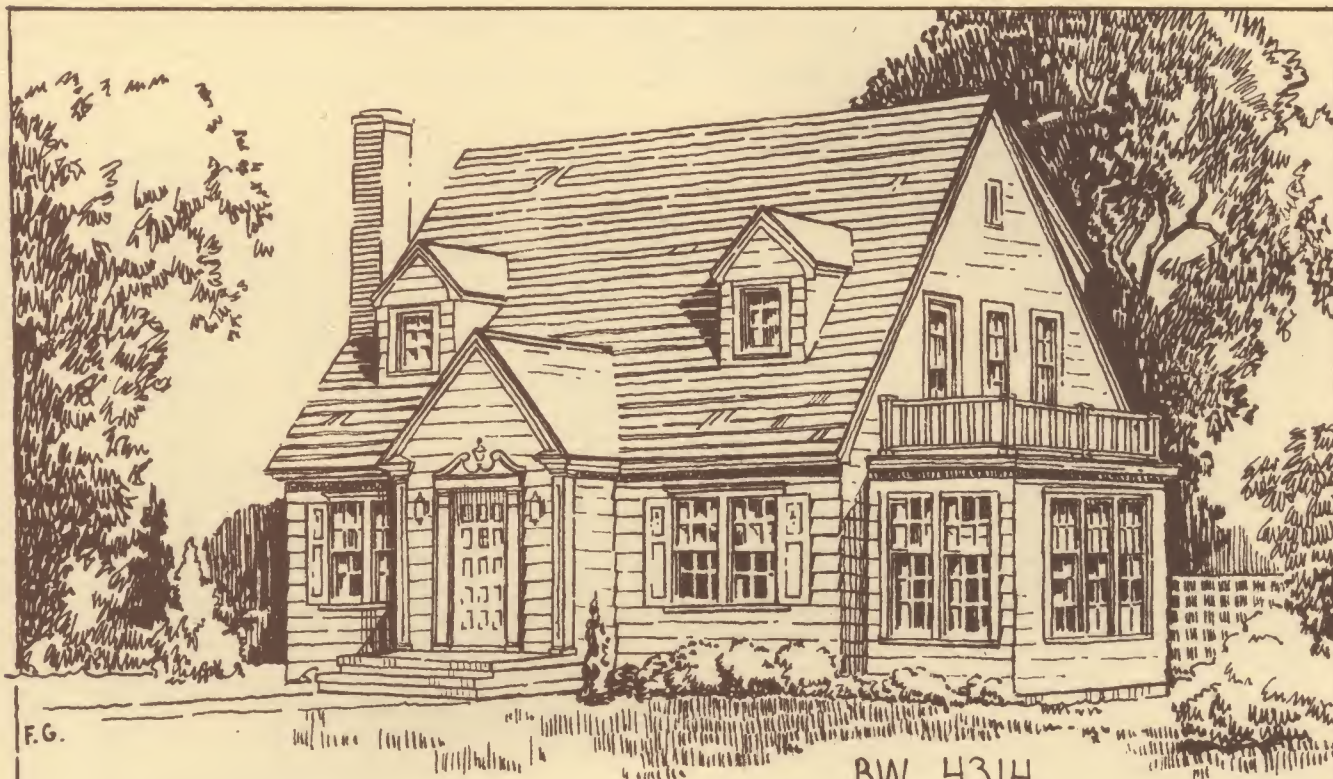

BW 4313

SMALL HOUSE=24'-0" x 22'-0"

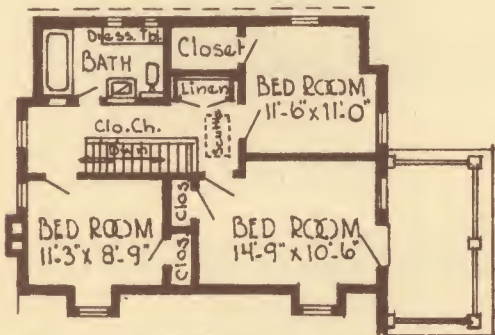

Economy and simplicity in construction are the features of this attractive small, one and a half story house. It is of frame construction with six inch siding exterior. The house is only 24'-0" x 22'-0" but has five comfortably sized rooms. The interior arrangement is practical and convenient and every bit of floor space has been utilized.

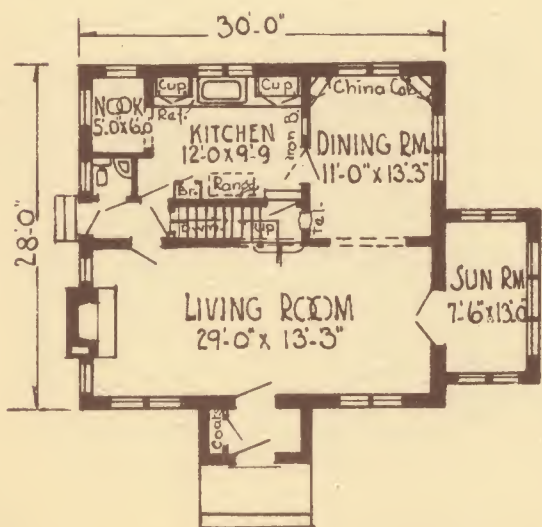

BW 4314

SIX-ROOM ENGLISH COLONIAL

Here is a design that will stand out among any group of houses as an example of fine architectural composition. A simple type of Colonial frame six-room house showing efficiency of space and economy in construction. The floor plans are equally well thought out. The first floor has a spacious living room with a sun room extending from it and an open fire-place directly opposite. The kitchen is well arranged for work. The sink is located in relation to the window so that good light and ventilation is assured. Two other desirable features are included in the lay-out - a breakfast room and a lavatory. The lavatory directly off the side entry, is accessible to both the living room and kitchen. The second floor provides three bedrooms of good size, with cross-ventilation and well supplied with closets.

SECOND FLOOR PLAN

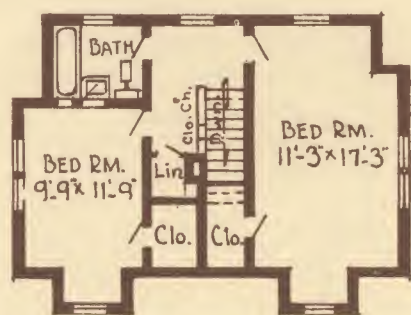

FIRST FLOOR PLAN

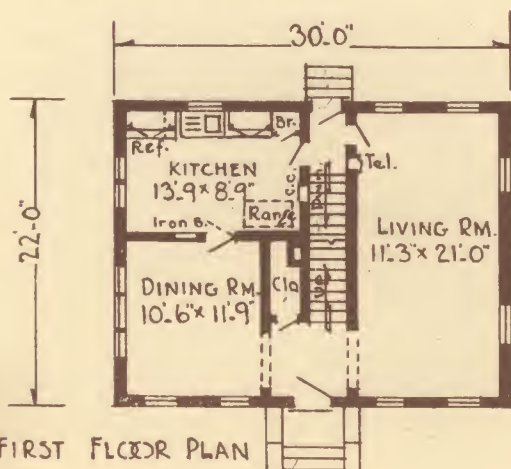

BW 4315

CAPE COD COLONIAL

SECOND FLOOR PLAN

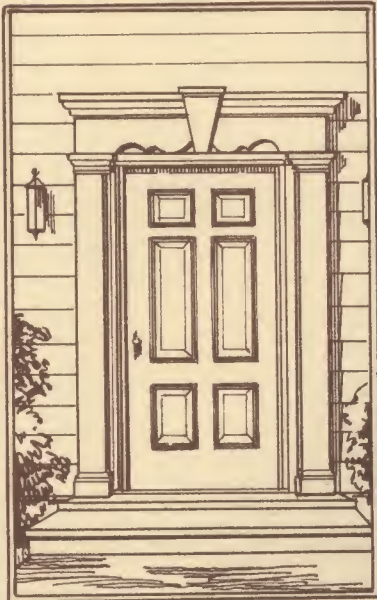

FIRST FLOOR PLAN

The one and a half story house pictured above is a splendid example of how attractive and well planned a small home maybe. The exterior is the popular Cape Cod Colonial design. It is 30'-0" x 22'-0" and has five good sized rooms. A large living room and two ample bed rooms are attractive features.

The Front Entrance

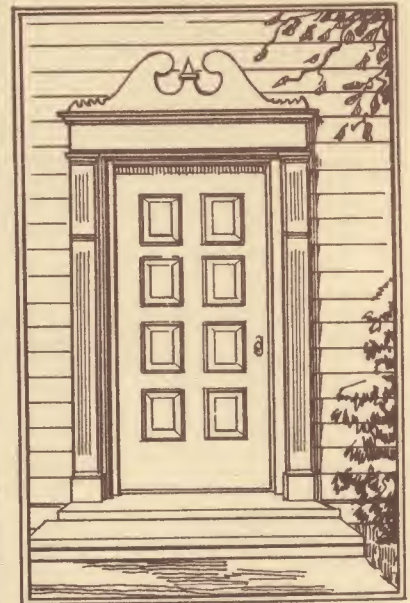

The entire home is dominated by its influence.

Entrance BW-417

BW-1010

Corner China Cabinet
BW-1005

The use of corner cupboards in dining rooms dates back to before the Civil war period and today they are even more popular. There is nothing more appropriate for the display of nice chinaware, pottery, etc, which the homemaker cherishes. The corner china cabinet is like an additional piece of furniture and is attractive in any dining room.

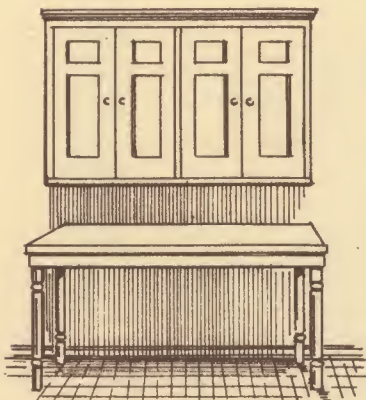

Cupboard BW-1094

Broom Closet
BW-1071

Soap Cabinet
BW-1096A

These illustrations furnish a few ideas in modern kitchen equipment. Kitchen cupboards are made to order to fit the individual requirements in any combination. The individual broom closet shown, can be attached to either side of a cupboard or fitted into a corner of the kitchen. The hanging cupboard is used as illustrated or as a supplementary cupboard in the breakfast room. The soap cabinet is a convenient place for soap, pastes, cleaning fluids etc, used around the kitchen.

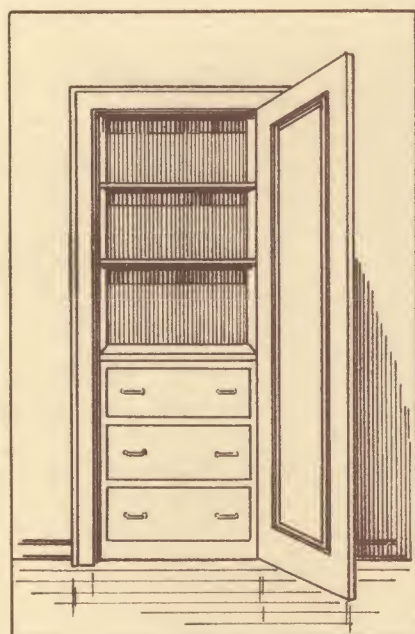

Venetian Medicine Cabinet

Medicine Cabinet BW-1098A

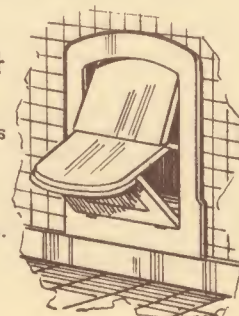

Towel Case BW-1104

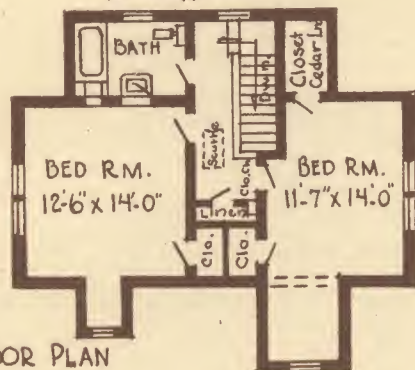

Provides indispensable space for towels and toilet articles.

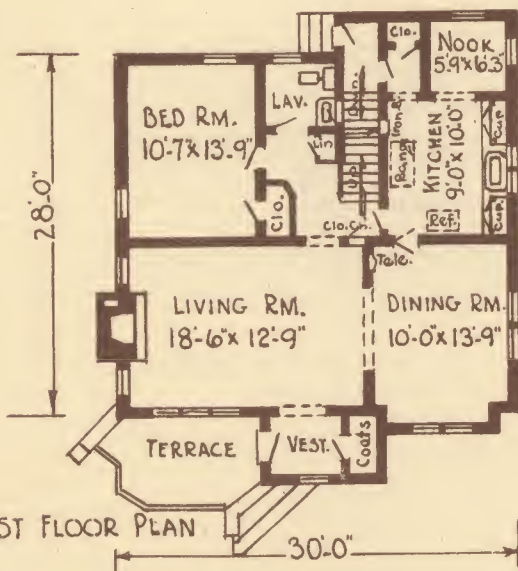

Bathroom Seat
BW-1102A

A very ingenious idea—Folds up into the wall. Will support a weight of 300 lbs.

SECOND FLOOR PLAN

FIRST FLOOR PLAN

BW 4316

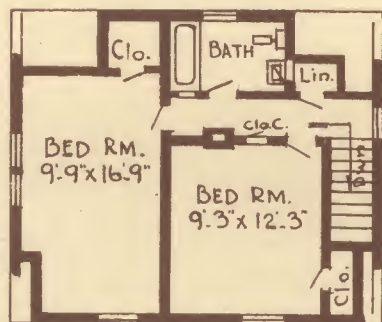

SIX-ROOM ENGLISH COTTAGE

The charming design of a six room English cottage shown in the above illustration is 30'-0" x 28'-0". It is of frame construction with stucco exterior. An unusually attractive front is obtained by the half-timbering in the gable and vestibule, and by the open terrace with the long French windows leading out on it. The lay-out of the interior is exceptionally well planned. The first floor includes a large living room with fireplace, a dining room, a kitchen with nook adjoining and a bedroom and lavatory. The second floor has two large bedrooms and bath.

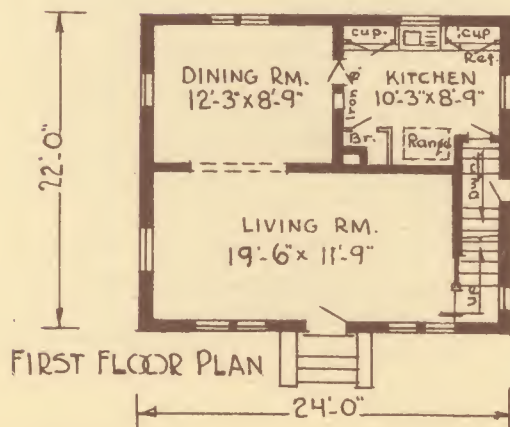

BW 4317

SMALL 5 ROOM HOUSE

SECOND FLOOR PLAN

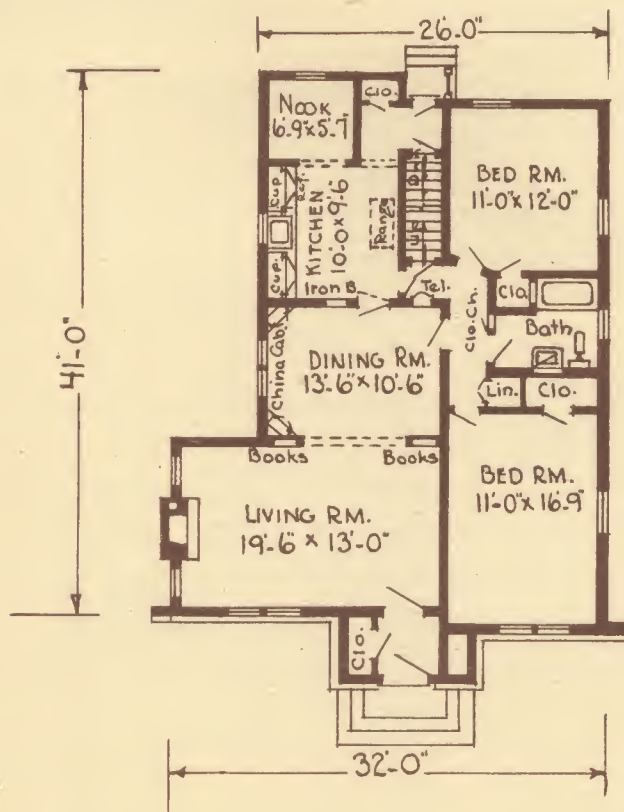

FIRST FLOOR PLAN

This attractive five room house has been planned to reduce building costs to the minimum. It is a story and a half siding house, built on 10 ft. studs and is only 24'-0" x 20'-0". It has a pleasing, though simply designed exterior. The floor plans are well arranged and waste space is practically eliminated.

BW 4318

MODERN ENGLISH DESIGN

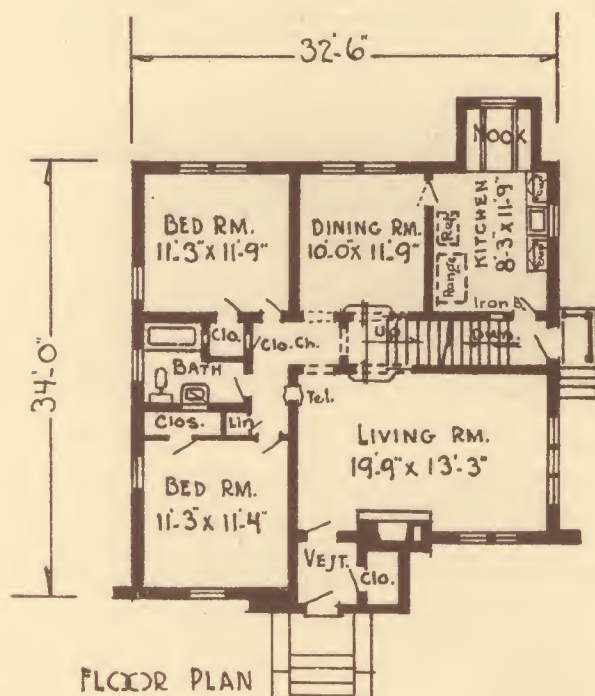

FLOOR PLAN

Due to the harmonious combination of stucco, stone, siding, and timber-work, the exterior of the bungalow has a very charming effect. This bungalow is one of most popular designs being built today. The interior arrangement is equally as pleasing as the exterior. One of the most attractive features of the plan is the spacious living room with a fireplace at one end. The bedrooms are entirely separated from the living quarters. They are both good sized rooms with cross ventilation. There is a spacious attic which can be finished into two full height bedrooms.

BW. 4319

ADAPTED from ENGLISH COTTAGE

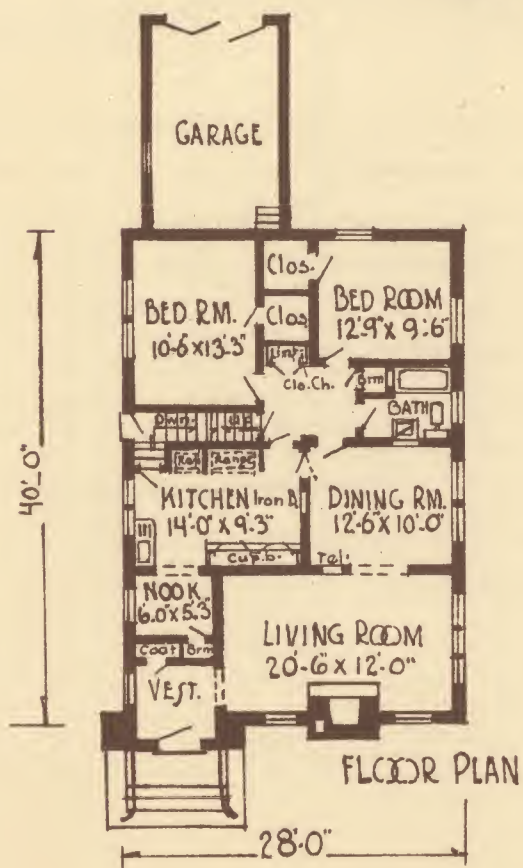

Although this bungalow is modern American style certain features borrowed from the English cottage give it a quaint and picturesque appearance. A harmonious combination of stone, stucco, siding and timber work give a striking appearance to the exterior. The floor plan of the bungalow is well laid out — a large living room with fireplace, an open stairway accessible from either living room or dining room, a kitchen, modern in every respect, with built-in nook adjoining and two good sized corner bedrooms segregated from the living quarters. There is a large attic which could be made into two bedrooms if desired.

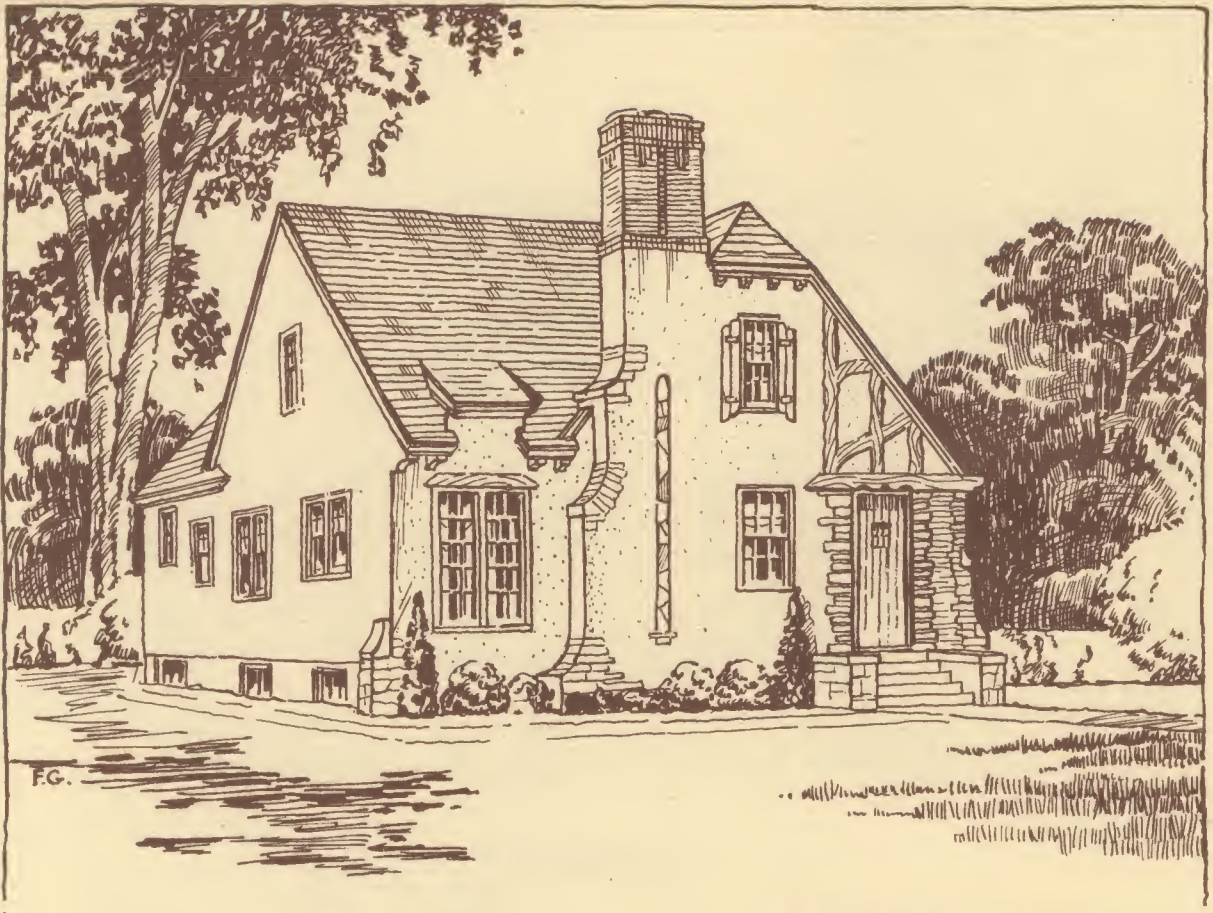

BW 4320

ENGLISH BUNGALOW

This attractive English-type five room bungalow has proved exceedingly popular. It is of frame construction with stucco exterior. The lay-out is most successful for a bungalow. It includes a large living room with fireplace, dining room, kitchen, breakfast nook, and two bedrooms and bath connected by a small hall and well separated from the living quarters. There is a large attic, which if desired can be made into two bedrooms. An attached garage, which is entered from the basement, is another attractive feature.

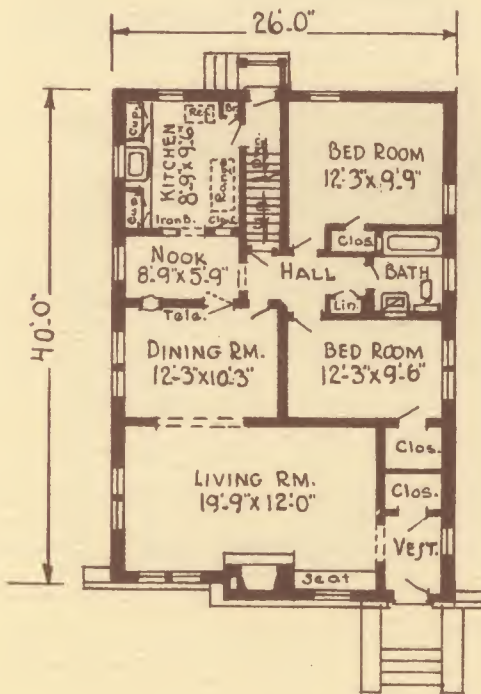

F.G.

BW 4321

A POPULAR ENGLISH TYPE BUNGALOW

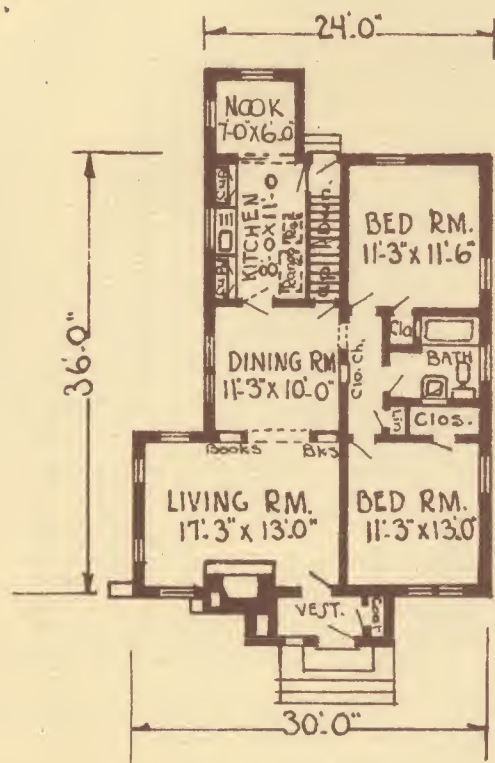

FLOOR PLAN

The attractive English bungalow illustrated here is 26'-0" x 39'-0". It is of frame construction with stucco exterior and stone trim. The plan has rather an unusual arrangement and affords the utmost comfort in a five-room bungalow. Every room is of comfortable size and privacy of the bedrooms is observed. The attic has enough height for two bedrooms.

BW 4322

SMALL TWO-BEDROOM BUNGALOW

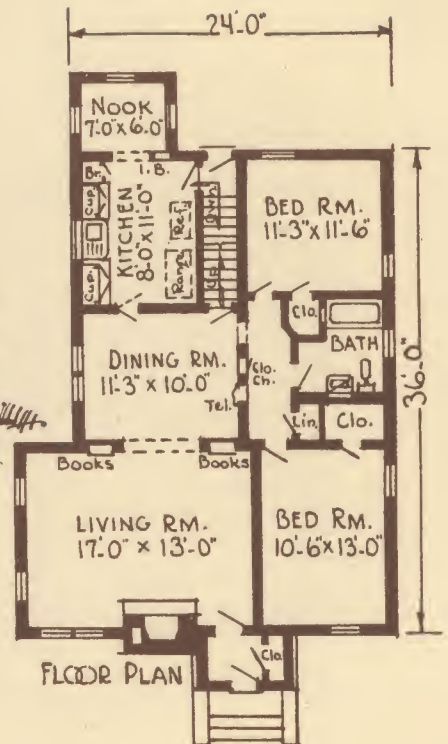

FLOOR PLAN

This two-bedroom bungalow is only 36'-0" long and 24'-0" wide with a 30'-0" front. Although it is a small, economically constructed home, its pretentious, wide front, gives it the appearance of being a large expensive bungalow. The living room with its splendid fireplace, is well lighted, and the adjacent dining room gives ample space for entertaining. The kitchen, though small, is well arranged and contains all the modern built-in features. The adjoining breakfast nook is also a desirable feature. The bedrooms on the other side of the house have cross light and ventilation and are convenient to the bathroom through a short connecting hall. There is a shallow attic which can be used for storage.

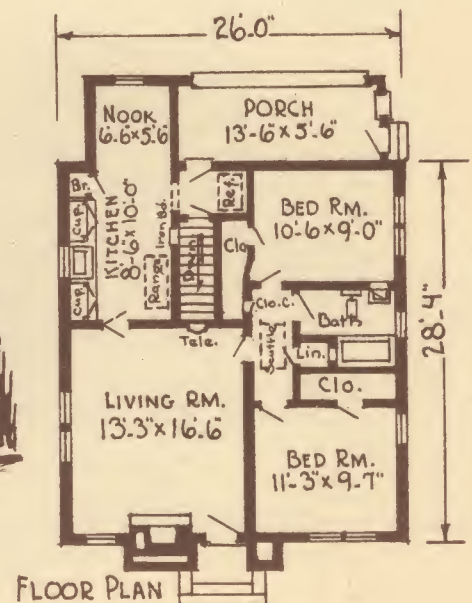

BW 4323

The exterior of this little home shows a variety of materials that have been put together very artistically. Brick, stucco, half timber work and stone all blend into an attractive combination and dissipate any suspicion of plainness. There is a conventional five room bungalow lay-out which will always be satisfactory to the majority of builders who desire an economical yet comfortable home.

BW 4324

Having to keep within a limited expense, when planning this little home, the dining room was eliminated in favor of a breakfast nook, which proved to be a sensible idea. Otherwise this plan is complete in every respect with a comfortable arrangement of rooms, although small.

THREE ATTRACTIVE BUNGALOWS for ONE FLOOR PLAN

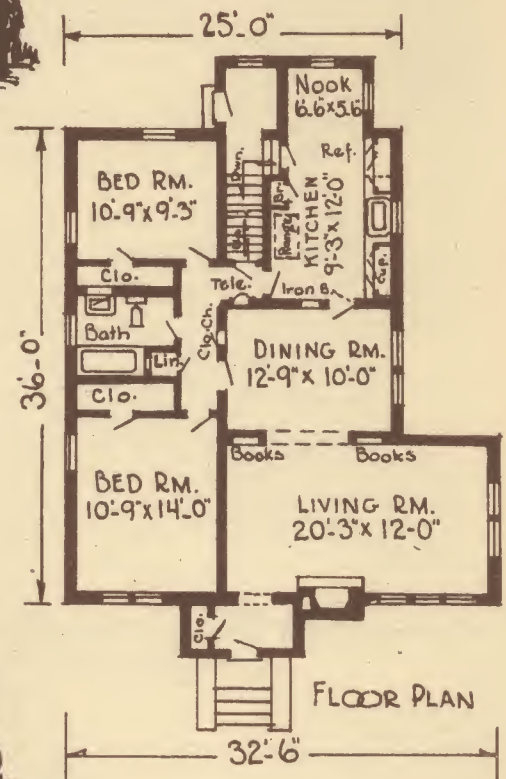

BW 4325

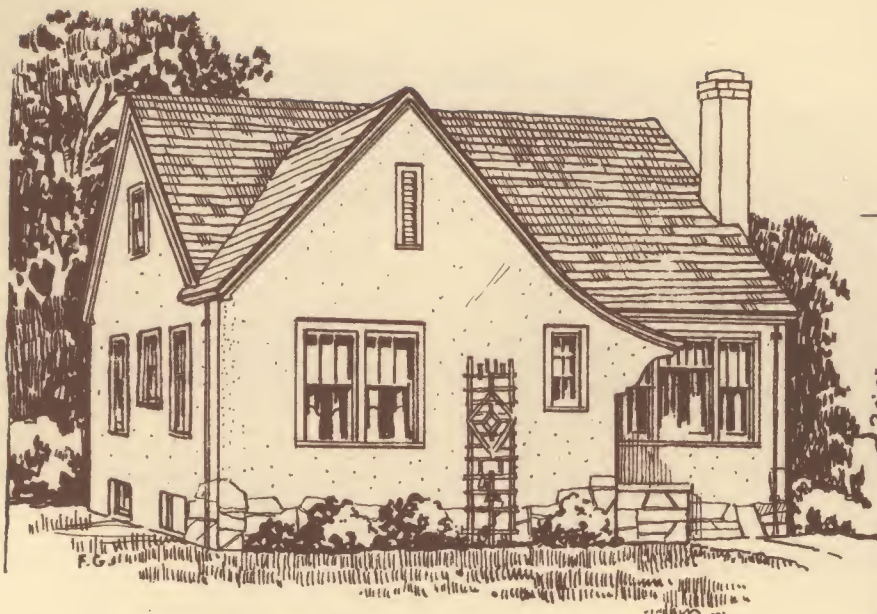

BW 4326

Although the three English type bungalows pictured above have different front elevations, they all have the same floor plan. The floor plan is 25'-0" x 36'-0" with a 32'-6" front, and has five well-arranged rooms and bath. There is room for two rooms and lavatory in the attic.

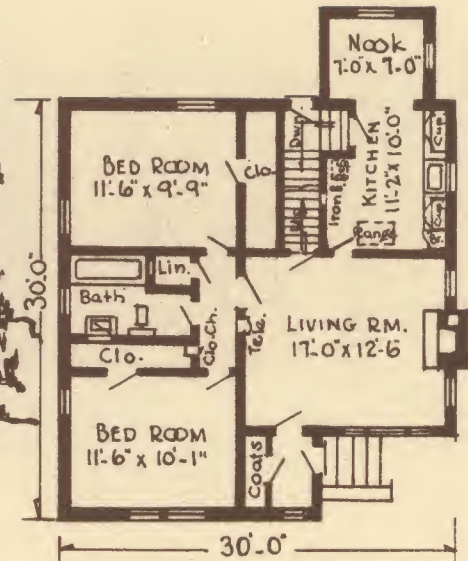

BW 4327

BW 4328

It is seldom that you see a home of these small dimensions that so completely fills the wants of the average family. Substituting the breakfast nook for the dining room reduces the size and effects a substantial saving.

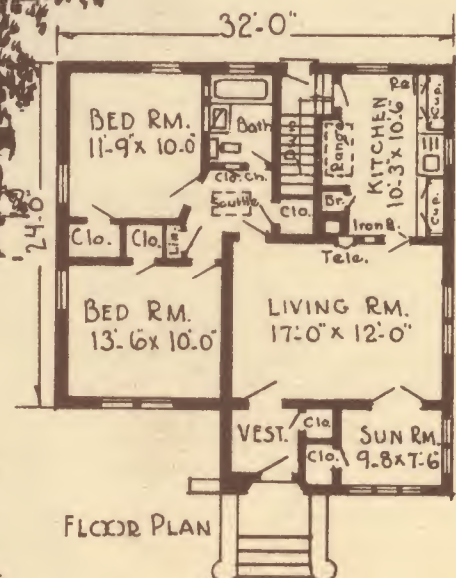

FLOOR PLAN

BW 4329

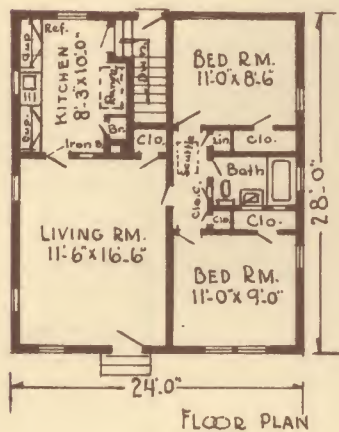

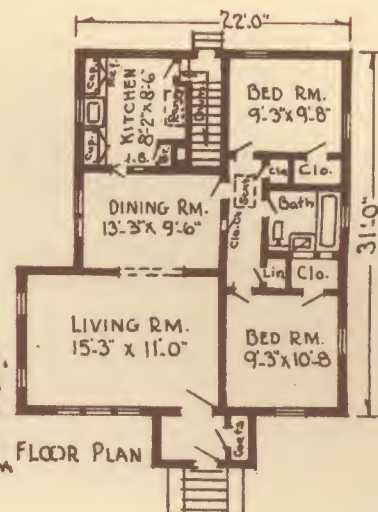

This plan shows an economical yet extremely satisfactory arrangement of rooms that will please the majority of families with a small income. We heartily recommend this design to the modest home owner who wants the most in a home for the least outlay.

BW 4337

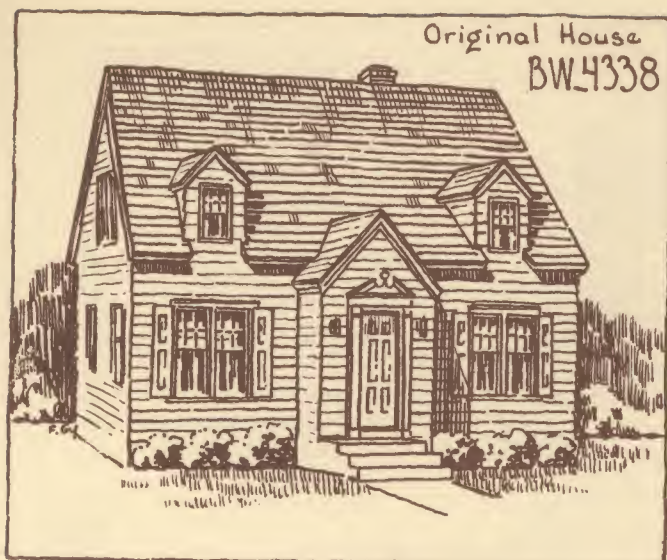

Enlarged Floor Plan
showing addition of a Living
room and Bed room in front
of original plan.

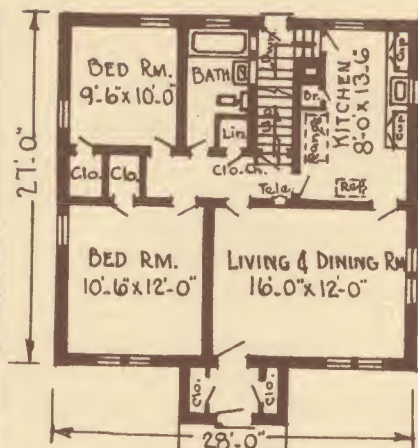

For people of limited means to build a home, the safest method for financing it is by building the house in units. The initial investment must be proportionate to the owner's income and money he has saved. Future needs must be planned for in advance so that when the house is completed the floor plans and exterior will be satisfactory.

The first unit of the house pictured above is 26'-0" x 20'-0".

It has a bedroom, bath and kitchen—the dining room temporarily to be used for a living room. Completing the plan by the addition of a second unit in the front of the house, a large living room and bedroom are added and as a result an attractive and well laid out bungalow is obtained.

Original House

BW-4339

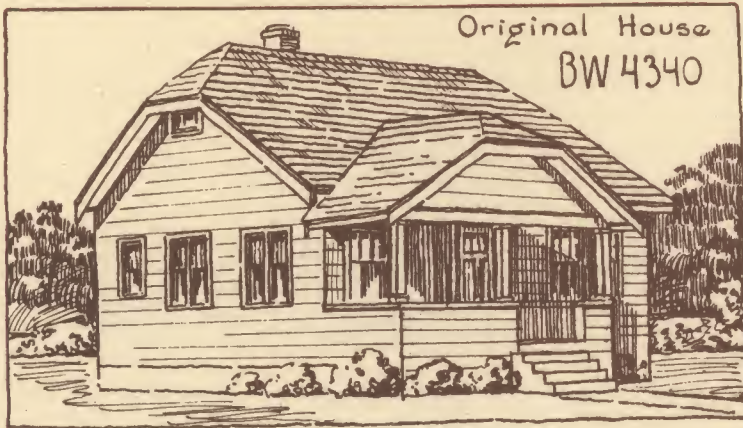

Completed second floor
plan with 2 Bedrooms
and lavatory

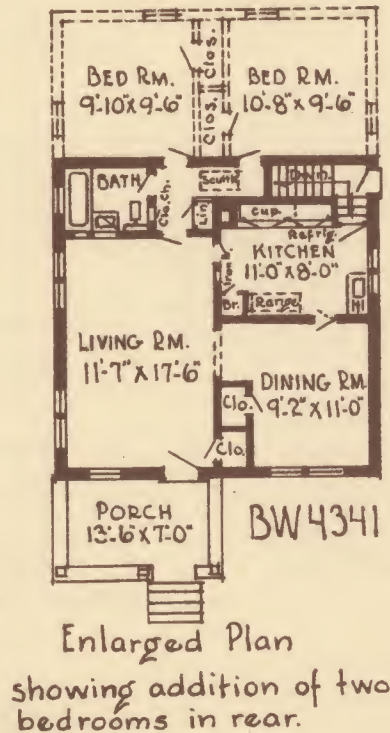

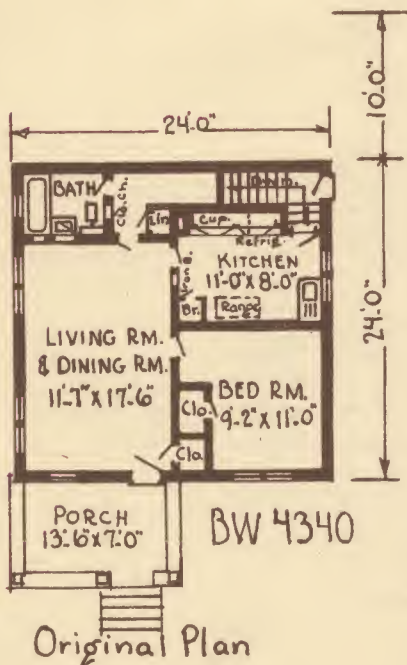

BW-4339

Enlarged First Floor Plan showing
addition of Porch and Dining room
and the front Bedroom eliminated
to make a more spacious living room.

The Cape Cod Colonial pictured here is designed for future enlargement. The smaller illustration shows the original unit of the house and to the right of it, the original floor plan. This first unit in itself is a very complete and satisfactory plan. No rooms are finished upstairs and for the present, the living room is partitioned off so that part can be used for a bedroom. In the future, when the house is completed, the living room will extend across the front of the house, a dining room and porch will be added and the second floor will be made into two bedrooms and lavatory.

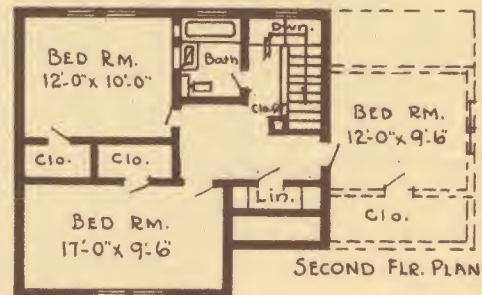

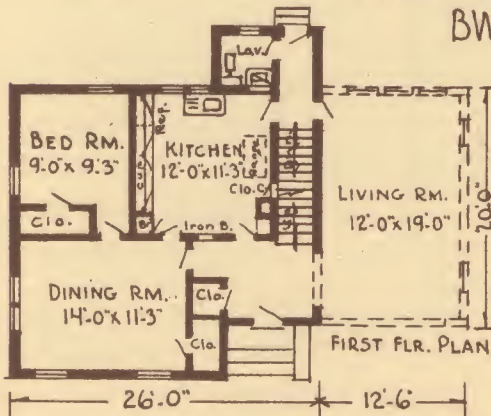

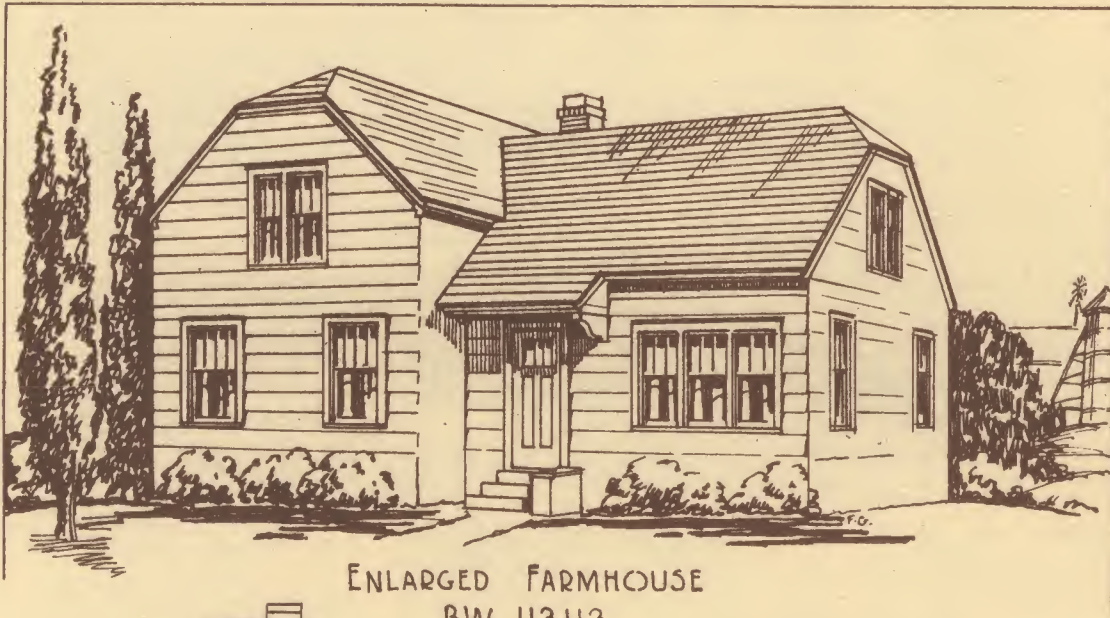

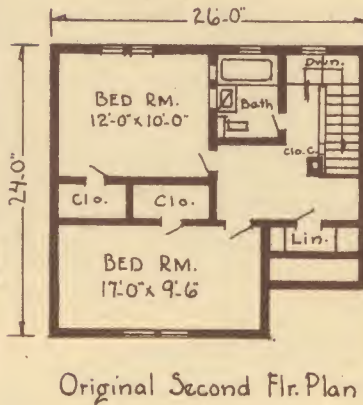

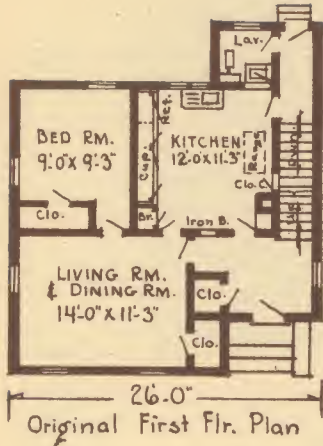

UNIT BUNGALOW
Designed for future enlargement

Here is a splendid suggestion for one, with limited means, who wishes to build a home. The smaller illustration shows the original unit of the house. The original floor plan includes three rooms and bath, the dining room at present to be used as a bedroom. In the future, two bedrooms will be added to the rear of the house and a thoroughly modern and well planned bungalow will be the result.

A FARMHOUSE

Designed for future enlargement.

Use MAIZEWOOD

MAIZEWOOD

**STOPS Winter Cold
BREAKS Summer Heat
Economically!**

as
**Sheathing
Plaster Base
and
Roof Insulation**

HIGHEST
INSULATING
EFFICIENCY

*Durability and Strength Proven
Under Most Unfavorable Tests*

Maizewood is made from cornstalks—one of the most important by-products of American agriculture. A new industry has been developed which will add to farm

income by using cornstalks as raw material. Maizewood is the outgrowth of years of research at Iowa State College by Dr. Orland Russell.

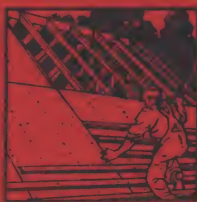

SHEATHING

As sheathing Maizewood gives greater rigidity than wood. It combines structural excellence with greatest insulation.

Furnished 48 in. wide,
6-0, 7-0, 8-0, 9-0, 10-0
and 12-0 long.

ROOF INSULATION

Maizewood is used under standard roofing materials. As roof insulation Maizewood is furnished $\frac{1}{2}$ in. and 1 in. thick. Standard slabs are 2x3 ft. but can be furnished in other sizes.

PLASTER BASE

Maizewood and plaster form an inseparable bond. Maizewood is not laminated, hence there are no layers to separate under a pull.

Furnished 18 in. x 48 in.
with shiplap joint.

Cornstalks Make Maizewood a Superior Insulating Board
